Motivated Software Engineering undergraduate with one year of internship experience in software development and software testing. Hands-on experience in designing and developing full-stack web, mobile, desktop, and WordPress applications using Java, PHP, Laravel, React.js, JavaScript, TypeScript, Node.js, MySQL, PostgreSQL, Firebase, and REST APIs. Strong foundation in object-oriented programming, database design, Agile methodologies, SDLC, debugging, and software testing. A quick learner with strong analytical and problem-solving skills, passionate about building reliable, scalable software solutions and contributing effectively within collaborative engineering teams.

🔧 TECHNICAL SKILLS

Programming & Development:

- Java
- J2EE
- PHP
- Laravel
- Node.js
- Hibernate
- WordPress

Frontend Development

- HTML
- CSS
- JavaScript
- TypeScript
- React.js
- React Native
- Next.js
- Tailwind CSS
- Responsive Web Design

Database

- MySQL
- PostgreSQL
- Firebase

🔑 DEVELOPMENT TOOLS

- Git

🎓 EDUCATION

Java Institute For Advanced Technology with Birmingham City University, *Bachelor of Science with Honours Software Engineering*
2022 – Expected 2026

Java Institute for Advanced Technology,
Professional Higher Diploma in Software Engineering (FQ-UK)
03/2025 – 02/2026

Java Institute for Advanced Technology,
Professional Diploma in Software Engineering (FQ-UK)
2024 – 2025
Passed all subjects

G.C.E Advance Level
2024
Passed all subjects (Technology Stream)

Bhatkhande Sangit Vidyapith, Visharad
2020 | Lucknow

🏢 PROFESSIONAL EXPERIENCE

Software Engineering Intern, *Think Tank Technologies (Pvt) Ltd*
01/2025 – 01/2026 | Sri Lanka

- Contributed to development and **testing of web-based applications** in a real-world environment
- Performed testing and debugging activities to **ensure application reliability**
- Identified and reported defects, helping to **reduce bugs in deployed features**
- Documented and reported bugs, supporting debugging and issue resolution
- Conducted **basic regression testing** after feature updates
- Collaborated with developers to improve system performance and usability
- Worked across multiple technologies, demonstrating adaptability and problem-solving
- Completed **960+ hours of internship training (equivalent to 6 months full-time experience)**
- Gained exposure to **Software Development Life Cycle (SDLC)** and Agile-based workflows

📁 PROJECTS

Home Service Booking Application (Full Stack)

- Developed a full-stack home service booking platform with **real-time client and technician tracking**
- Implemented **live booking system** with scheduling and service assignment
- Integrated **real-time payment handling** for seamless transactions

- VS Code
- Netbeans IDE
- MySQL Workbench
- Android Studio

QA & TESTING SKILLS

- Manual Testing (Functional Testing, UI Testing, Regression Testing)
- Test Case Design
- Bug Identification & Reporting
- Software Debugging & Issue Tracking
- Understanding of SDLC & STLC
- Familiar with Agile/Scrum practices

- Designed backend APIs to manage users, services, and booking workflows
- Ensured system reliability through **manual testing, bug fixing, and validation of booking/payment flows**
- Identified and fixed defects, which **reduced bugs and improved system stability**
- Performed **functional and regression testing** to maintain system stability after updates

Project Management System,

PHP | PostgreSQL | Laravel | Alpine.js | JavaScript

- Built a web application to manage projects, milestones, tasks, assign members and team workflows.
- Implemented authentication, role-based access, and database-driven dashboards.
- Created and executed basic test cases to validate application functionality.

E - Commerce Web Application, PHP | CSS | HTML | MySQL | JavaScript

- Developed and tested a full-stack e-commerce system using PHP and MySQL
- Designed and executed test scenarios for login, cart, and checkout processes
- Identified and fixed UI and backend issues during development
- Performed regression testing after feature updates

POS System, Java | MySQL

- Built and tested a desktop POS system with invoice and stock management
- Verified system accuracy through manual test cases
- Detected and resolved functional bugs during development

Real Time Chat Application, React Native | MySQL | Hibernate | Tailwind

- Developed a real-time chat system supporting instant messaging between users.
- Implemented WebSocket based communication for live message delivery.
- Designed backend APIs for user authentication and message storage.
- Built responsive frontend using React Native.

University Management System, Java Swing | MySQL

- Developed a full-stack system with QR-based features
- Conducted testing for core modules including quotation and invoice generation
- Validated system workflows and improved reliability

Additional Projects

- Invoice Generating Web Application (PHP)
- To-Do List Mobile App (React Native)
- Fish Export/Import Web Application (React)
- 5 WordPress Projects
